

Automation

Robotic Machine Tending

Relieve workers of repetitive tasks, such as part loading and unloading, freeing their time to perform more challenging operations

Increase throughput, lower operating costs, and enhance your bottom line with the reliability and precision of OptiPro Automation Solutions

Take your production to new heights by automating simple tasks such as part loading and unloading. By integrating the latest robotic technology from leading companies such as Universal Robots, OptiPro provides state-of-the-art **Automation Solutions** for optical manufacturers looking to streamline operations. UR robots share many of the same advantages as OptiPro's optical fabrication equipment, including easy programming, fast set ups, and high reliability. Whether your company specializes in fabricating precision optics in short-run quantities or high volume production, a variety of automation solutions can be tailored to your specific application.

Automate and prosper by partnering with OptiPro.

Trusted Technology.
